For all claims, please have your receipt and item number when you call. The product item number can be found on the front cover.

If you are instructed to return the product for service, you are responsible for shipping the unit at your expense.

PRODUCT REGISTRATION

Important: The product registration form on page 29 and a copy of your receipt must be completed and returned within 10 days of purchase to validate your warranty.

WARNING: Parents - Please read instructions carefully. Not for use by children without adult supervision.

Thank you for purchasing the GLD Solar Blast Dartboard. The computerized scoring system makes game playing easy and enjoyable. With 48 games and 275 options to choose from, beginners and more advanced players will find challenging games to suit them.

TOOLS REQUIRED

- Tape measure
- Nail or marker
- Phillips screwdriver
- Level
- Mounting hardware (provided)

UNPACKING THE GAME

After unpacking the game, it is important to save the original box, all packing material, and the receipt. These items will be needed if it ever proves necessary to return the game for service.

MOUNTING (PHYSICAL INSTALLATION)

Two methods for mounting the dartboard are available.

1. Use the three keyhole slots and mount the center of the dartboard following the illustration. The three screws are screwed into the wall until the screw head is 3/8" away from the wall. The dartboard is positioned so the two screw heads are inside the keyhole. Slide the dartboard down to secure. The head of the screw that is used must be larger than 5/16" and smaller than 3/8".
2. Four equally spaced holes are accessible from the front to drive in screws. With the dartboard held in place, four screws are driven in from the front, through the existing holes. Use 1/8" diameter screws. The head of the screw must fit inside the pocket.

Wall Anchors

A wall with studs is the most common type of wall to mount the dartboard.

1. Locate a stud and use wood screws or sheet metal type screws to secure the dartboard.
2. If a stud cannot be located or is not in the proper location, use an anchor that is suitable for the type of wall.

Some common anchors are:

Plastic - Drill a snug hole in drywall and push the anchor in up to the head. When the screw is screwed into the anchor, the plastic will expand, locking the anchor in place. Do not use on thin panelling.

Toggle Bolt - Drill hole through wall. Hole must be large enough for the wings to pass through. Insert screw through the holes in the dartboard and thread the toggle wings just onto the screw. Fold the wings back and push through the hole until the wings spring open. Pull back on the screw to hold wings against the inside of the wall and tighten screw.

Hollow wall anchor - Drill a snug hole through the wall. Tap anchor into the hole until the prongs on the underside of the head are seated securely into the wall. Turn screw in and apply pressure to keep the anchor head from turning. Tighten screw until resistance is felt. Do not over tighten. Turn screw out to remove. Anchor will stay and screw can be replaced.

Other methods are available. Consult a hardware store if questions arise.

Mounting Using the Four Holes From the Front

1. Choose a location that is near an electrical outlet and has at least 10 feet of open floor space in front of the board. Use a wall stud for mounting whenever possible.
2. Two people are needed for this step. Hold board on the wall. Position center of bullseye 68" from the floor. Level the board. Hold in place.
3. Locate the four mounting holes on the front of the board. Use a marker or nail to mark the position of the board through the four mounting holes onto the wall. Remove the board.
4. Drill four pilot holes on the marks created in Step 3.
5. If using plastic anchors: drill the holes so the anchors fit snugly. Push anchors into place.
6. Line up dartboard over anchors. Screw board into place. The screws will expand the anchors.
7. Place a toe line 96" from the face of the board for the throwing distance. Adhesive tape or masking tape, 2' long by 2-1/2" wide, may be used.
8. After the board is mounted, the bullseye should be 68" (173 cm) above the floor.

Mounting Using the Keyhole Slots

1. Choose a location that is near an electrical outlet and has at least 10 feet of open floor space in front of the board. Use a wall stud for mounting whenever possible.
2. Determine the location for the dartboard. Place a mark on the wall 68 inches (172.7 cm) from the floor. This mark is the final position of the center of the dartboard (bullseye).
3. Locate studs and use wood screws or sheet metal screws to secure the dartboard if the mark is on the stud. The head of the screw must be larger than 5/16" and smaller than 3/8".
4. If the mark is not over a stud, use the mounting hardware that came with your dartboard.
5. Measure 8" (20.3 cm) directly up from the bullseye mark and place a mark on the wall. Then measure down 8" (20.3 cm) from the bullseye mark and place a mark on the wall. Use a level to check that all three marks are vertical.
6. Use the top mark and measure out level 8" (20.3 cm) to the left and right. Place a mark on the wall at both locations.
7. Drill pilot holes at the three marks. These are for the mounting screws.
8. If using wall anchors, follow the instructions under *Wall Anchors* on page 5.
9. Insert screws into anchors until a 1/4" (6.5 mm) gap is left between the wall and the screw head.

POWER INSTALLATION

The dartboard is designed to be powered by an AC to 9V DC, 500 milliamp (minimum) adapter, with the DC plug polarity configured as positive (+) outside, and negative (-) center. To connect the adapter, plug the DC plug into the DC power jack on the dartboard and the AC plug into an electrical outlet.

1. The board is not intended for children under the age of 3 years old.
2. The board must only be used with the recommended transformer.
3. The transformer is not a toy.
4. Disconnect the dartboard from the transformer before cleaning.

PROTECTIVE FILM

This electronic dartboard has a clear protective film over the entire display and button area to prevent scratching during shipping. It is recommended that you remove this film for easier reading of the display. To remove, simply lift edge, peel off and discard.

WARNING:

Not for use by children without adult supervision. Darts are not toys and may cause injury if used improperly. Everyone must stand behind the dart thrower.

IMPORTANT NOTES

1. During shipping or in the course of normal play, it is possible for scoring segments of this board to become temporarily jammed, resulting in a “frozen” board. If this occurs, the built-in **Self Diagnostic Function** of the e-BOARD Computer will be activated automatically. Your dartboard will run a self-test routine to determine which segment is stuck. An error message will flash on the display together with the number for the “Frozen” segment.

Error Code

Err 42
 Err 35
 Err 34
 Err 33
 Err 32
 Err 31
 Err 30
 Err 29
 Err 28
 Err 27

Malfunction

Stuck Bull Button
 Stuck Start/Next Button
 Stuck On/Off Button
 Stuck Computer Button
 Stuck Bounce/301 Button
 Stuck Eliminate/Cricket Button
 Stuck Double/Autochange Button
 Stuck Player/Page Button
 Stuck Sound Button
 Stuck Option Button
 Stuck Game Button
 A segment is stuck, the number is the number of the segment. If it is a triple segment it will have 3 horizontal lines and a double will have 2.).

Take the following steps immediately when the error message appears.

- a. Find the “frozen” segment according to the display.
- b. Press firmly down on the “frozen” segment until it breaks free and the loose fit is restored. Once the “frozen” segments are loosened, the error message should be gone and the board will continue to operate normally.
2. This game is designed for use with 3/4" length soft-tip darts only! Never use metal tipped darts or longer soft-tip darts on this dartboard! Metal tipped darts will seriously damage the circuitry, the e-BOARD computer, and electronic operation of the dartboard.
3. Electronic and mechanical reaction time is required between shots. If two shots occur too close together, pull out second dart and rethrow to properly record your score.
4. Use only the provided AC adapter. **Using the wrong adapter may cause electrical shock and damage to the unit.**
5. Do not use excessive force when throwing darts. Throwing a dart too hard will cause frequent tip breakage and cause excessive wear on the board.
6. Do not spill liquids on the dartboard. Do not use spray cleaners that contain ammonia or other harsh chemicals, as they may damage the dartboard. Instead, we suggest regular dusting with a damp cloth. Make sure the game is unplugged and use a mild detergent and a damp cloth for more vigorous cleaning.
7. This game is for indoor use only.

GAME OPERATIONS

<u>Segment Scoring</u>	<u>Scoring Rules</u>
Single scoring segment	score times 1
Double scoring segment	score times 2
Triple scoring segment	score times 3
Outer bullseye	25 times 1
Center bullseye	25 times 2

QUICK START - IF YOU JUST WANT TO START THROWING DARTS

1. Turn game on by pressing the ON/OFF button.
 2. Press the START/NEXT button.
- NOTE:** The default game is G01 301 Count Down with 2 players.
3. Press the PLAYER button to select the number of players.
 4. Press the START/NEXT button to start the game.
 5. Take turns throwing darts. When a players score reaches exactly 0 they are the winner.

9. Press START/NEXT to start a game.
10. If a dart thrown at the dartboard scores, but does not stick in the dartboard, press the BOUNCE/301 button until the score you want to eliminate is displayed at the Temporary Score display. Then eliminate the score by pressing the ELIMINATE/CRICKET button.
11. The Eclipse is equipped with a Cyber Player playing feature. Players can select a Cyber Player to play in the game by pressing the COMPUTER button. Four levels of Cyber Player can be selected before the game starts:
 - CPU HI (Cricket display has 7 circles) Professional Level
 - CPU MED (Cricket display has 5 circles) Intermediate Level
 - CPU LOW (Cricket display has 3 circles) Beginner Level
 - CPU OFF (default) (Cricket display is blank) CPU Option Off

When a Cyber Player is selected the Computer LED will be lit. When the game begins the last player to throw will be announced as “Cyber Player”. The cyber player will then post three scores.
12. When a player finishes the game first, the game will announce “winner” and the celebration applause will be heard.
13. AUTO PLAYER CHANGE - When a game starts the Auto Change LED will be lit. This means the Automatic Player Change feature is on. During a game, you can press the DOUBLE/AUTO CHANGE button to select or deselect automatic player change or manual change for the next player’s turn. If automatic change is selected, after 3 throws, the dartboard will change to the next player automatically in 10 seconds if the START/NEXT button is not pressed. For manual change, the players need to press the START/NEXT button to change players.
14. Sound effect option - you can choose to play with or without electronic sound effects by pressing the SOUND button. Three levels can be chosen:
 - Sound OFF
 - Sound LOW
 - Sound HI
15. During a game, if you wish to quit or select another game, press the GAME button to return to the main menu.
16. To turn off the dartboard, press and hold the ON/OFF button.

ECLIPSE GAME DESCRIPTIONS & RULES**G01 301 Count Down (with options of 301, 501, 601, 701, 801, 901 and Single In/Single Out, Double In/Single Out, Double In/Double Out, Single In/Double Out and Single Bull, Double Bull)**

Before starting the game you must select the number of players, your desired option and if you would like, a Double In or Double Out option. Your options are the starting score for the game, see the chart below.

Option	301	501	601	701	801	901
Starting Score	301	501	601	701	801	901

The starting score for each player is 301 (or 501/601/701/801/901) as selected before starting the game. The score will be deducted for each dart that scores. The first player who reaches exactly zero wins.

For Single In or Single Out options, the game can be started or ended by throwing at any segment, regardless if single, double or triple. If you select Double In, you must hit a double segment to start the game. If you select Double Out you must hit the double segment, that brings your score to zero, to end the game. If Double Out has been selected, the Dart Out feature is automatically activated. In this mode, once a player is 170 or below, the e-BOARD Computer will suggest the best possible finishing shots, or if an OUT is not possible, the best remaining alternative shots.

G02 301 League (with options 301, 501, 601, 701, 801, 901 and Single In/Single Out, Double In/Single Out, Double In/Double Out, Single In/Double Out and Single Bull, Double Bull)

Before starting the game you must select your desired option and if you would like, a Double In or Double Out option. Your options are the starting score for the game, see the chart below.

Option	301	501	601	701	801	901
Starting Score	301	501	601	701	801	901

This game is played by 2 teams who compete with each other. Each team has 2 members. Team 1 is made up of Player 1 and Player 3. Team 2 is made up of Player 2 and Player 4. Similar to 301 Count Down, the team will win when one player's score reaches exactly zero, and his teammates score is lower than or equal to the sum of the score of the opposing team. Otherwise the score of the current player returns to the beginning of the turn. That team cannot win at that time.

For Single In or Single Out options, the game can be started or ended by throwing at any segment, regardless if single, double or triple. If you select Double In, you must hit a double segment to start the game. If you select Double Out you must hit a double segment to end the game. If Double Out has been selected, the Dart Out feature is automatically activated. In this mode, once a player is 170 or below, the e-BOARD Computer will suggest the best possible finishing shots, or if an OUT is not possible, the best remaining alternative shots.

G03 Simple Cricket (with options of 000, 020, 025 and Single Bull, Double Bull)

Before starting the game you must select the number of players and your desired option. The options are described in the table below.

Options	Description
000	Hit and open numbers 15-20 and bullseye in any order.
020	Hit and open the number 20 first, then in order, open numbers 19, 18, 17, 16, 15 and bullseye.
025	Hit and open bullseye first, then in order, open numbers 15, 16, 17, 18, 19 and 20.

Following the standard rules in Cricket only the numbers 15-20 and bullseye are used. The first player to hit each number 3 times and open them all is the winner. All valid hits will be confirmed and displayed by the Cricket Display.

Cricket Status	One Time	Two Times	Open
Sign			

NOTE: A single segment counts as one hit, a double segment counts as two hits and a triple segment counts as three hits.

G04 Standard Cricket (with options of C00, C20, C25 and Single Bull, Double Bull)

Before starting the game you must select the number of players and your desired option. The options are described in the table below.

Options	Description
C00	Hit and open numbers 15-20 and bullseye in any order.
C20	Hit and open the number 20 first, then in order, open numbers 19, 18, 17, 16, 15 and bullseye.
C25	Hit and open bullseye first, then in order, open numbers 15, 16, 17, 18, 19 and 20.

Same as Simple Cricket, except more complicated scoring and winning procedures as follows:

- When a number has been hit 3 times by a player, it is then open to that player and any further hits by that player will score points.
- Once a number has been hit 3 times by all the players, that number is then closed and can no longer be scored upon by any player. At that time the indicator LED will change to closed for that number.
- A player who has opened a number can continue to score on that number until it becomes closed.
- All valid hits will be confirmed and displayed by the Cricket Display.

Cricket Status	One Time	Two Times	Open	Close
Sign				 Circle flashes

- A player wins the game when he first opens all the numbers and has an equal or greater score than the other players. However, if players are tied on points, or have no points, the first player to open all numbers wins.
- If a player has opened all numbers first, but is behind on points, scoring continues on open numbers. If that player has not accumulated the highest point total by the time another player opens all their numbers, the player with the most points will be the winner.

G05 Cut Throat Cricket (with options of C00, C20, C25 and Single Bull, Double Bull)

Before starting the game you must select the number of players and your desired option. The options are described in the table below.

Options	Description
C00	Hit and open numbers 15-20 and bullseye in any order.
C20	Hit and open the number 20 first, then in order, open numbers 19, 18, 17, 16, 15 and bullseye.
C25	Hit and open bullseye first, then in order, open numbers 15, 16, 17, 18, 19 and 20.

Same rules as Quick Cricket EXCEPT the points are added to all of your opponent's totals once scoring begins. The player who first opens all numbers with the lower score wins.

G06 Scram Cricket (with options of Single Bull, Double Bull)

This game is a variation of Cricket. The game consists of 2 rounds. In the first round, player 1 must close 15 through 20 and bullseye, while player 2 attempts to get as high a score as he can by scoring the open numbers. Round 1 will be finished when all numbers have been closed. For round 2, the reverse is done. The player with the highest score after both rounds is the winner.

G07 Double Only Cricket (with options of C00, C20, C25 and Single Bull, Double Bull)

The options are described in the chart below.

Options	Description
C00	Hit and open numbers 15-20 and bullseye in any order.
C20	Hit and open the number 20 first, then in order, open numbers 19, 18, 17, 16, 15 and bullseye.
C25	Hit and open bullseye first, then in order, open numbers 15, 16, 17, 18, 19 and 20.

This game is the same as Standard Cricket EXCEPT that you have to hit a double segment for each number first, in order for hits or scoring to be possible.

For example, to start with the number 20, you must hit the double 20 segment. Any hits before you do this will count as a miss. Once you've hit your double 20 you have three possibilities for that number:

- If you hit a single 20 it will open the 20 for scoring.
- If you hit a double 20 it will open the 20 for scoring and score you 20 points.
- If you hit a triple 20 it will open the 20 for scoring and score you 40 points.

Once all players have opened a number that number will close and no one can score on it anymore.

G08 Killers (with options of -7, -8, -9, -10, -11, -12, -13, =3, =5, =7, =9 and Single Bull, Double Bull)

Before starting the game you must select the number of players and your desired option. The options are the number of lives you have and what segments to hit for a kill, see the chart below.

Option	-7	-8	-9	-10	-11	-12	-13	=3	=5	=7	=9
No. of Lives	7	8	9	10	11	12	13	3	5	7	9
	Hit Single, Double or Triple to kill						Must hit Doubles only to kill				

To start this game, players throw a dart at the dartboard to select their number. The Temporary Score display will show SEL and the number selected will be used for the player throughout the game. No two players can select the same number in one game. To become a “Killer”, the player must hit the double in their number. Once you become a “Killer” you can then kill other players by hitting the segments of the number they picked until all their “Lives” are killed. Each hit can only “Kill” one “Life” regardless if it is a double or triple. When you become a “Killer” your score display will show - - -. The number of “Lives” remaining will be displayed on the player’s Cricket display. The last player with “Lives” will be the winner.

NOTE: For options =3, =5, =7, and =9 you can only kill if you hit a double. A single or triple count as a miss.

G09 Shanghai (with options of L01, L05, L10, L15, H01, H05, H10, H15, P01, P05, P10, P15 and Single Bull, Double Bull)

Before starting the game you must select the number of players and your desired option. The options are described in the table below.

Option	L01	L05	L10	L15	H01	H05	H10	H15	P01	P05	P10	P15
Game starts on number	1	5	10	15	1	5	10	15	1	5	10	15
	Can hit any segment				Must hit double or triple segments				Various doubles and triples must be hit as specified by the computer			

Each player must hit numbers 1 through 20 and the bullseye in order. The dartboard will display the number you are supposed to hit. Throw 3 darts for each number and the player who gets the most points at the end of the game wins. Your score is the number of the segment you are on. Hitting a double segment in the number you are on will double your points, likewise triple will triple your points. For example if you are on segment 4 and you hit a single in segment 4 you get 4 points. If you are on segment 4 and you hit a double in that segment you get 8 points.

G10 Count-Up (with options of 100, 200, 300, 400, 500, 600, 700, 800, 900 and Single Bull, Double Bull)

Before starting the game you must select the number of players and your desired option. The options are the set points which are the points needed to win, see the chart below.

Option	100	200	300	400	500	600	700	800	900
Set Points	100	200	300	400	500	600	700	800	900

Your score will be accumulated for each dart. The first player to reach or go over the set points will be the winner.

G11 Shoot Out (with options of -11, -12, -13, -14, -15, -16, -17, -18, -19, -20 and Single Bull, Double Bull)

Before starting the game you must select the number of players and your desired option. The options are the number of marks you must hit, see the chart below.

Option	-11	-12	-13	-14	-15	-16	-17	-18	-19	-20
No. of Marks	11	12	13	14	15	16	17	18	19	20

The e-BOARD Computer will randomly select a number for the player to hit. One correct hit scores one mark. The first player who hits 11, 12, 13...20 marks, depending on the option selected, is the winner. If a player does not hit the dartboard within 13 seconds, the dart is regarded as a miss and the e-BOARD Computer will automatically change to another random number for the player to hit for the next dart.

G12 Best of Nine (with options of 009, 012, 015, 018, 021, 024, 027 and Single Bull, Double Bull)

The options are the number of darts thrown for the game, see the chart below.

Option	009	012	015	018	021	024	027
No. of Darts/Rounds	9/3	12/4	15/5	18/6	21/7	24/8	27/9

The dartboard will announce “PLAYER 1” and display SEL in the Temporary Score display. Throw a dart to select your number. If you miss the dartboard you may continue to throw darts until you hit a number. The dartboard will then move on to the next player. Once all players have selected their numbers, each player will then take turns throwing three darts. The object is to hit the number you selected. For every single segment hit in your number you will get one point. For every double segment hit in your number you will get two points and for every triple segment hit in your number you will get three points. The Cricket display will count down how many rounds you have left. The player with the highest score at the end of the game wins.

NOTE: If all the players have the same score at the end of the game Player 1 will win. Player 2 will come in second, Player 3 third, and so on.

G13 Call Three (with options of 3, 4, 5, 6, 7, 8, 9, 10 and Single Bull, Double Bull)

The options are the number of rounds played for the game, see the chart below.

Option	R03	R04	R05	R06	R07	R08	R09	R10
No. of Rounds	3	4	5	6	7	8	9	10

The e-BOARD Computer will select a random number for each dart. The player must hit that number. Hitting the selected number in a single segment, is worth one point. If they hit the selected number in a double segment they get two points and if they hit the selected number in a triple segment they get three points. The Cricket display will count down how many rounds you have left. The player with the highest score at the end of all the rounds wins.

G14 Hound and Hare (with options of 005, 012, 009, 014, 011 and Single Bull, Double Bull)

The options are the number at which the Hound starts at, see the chart below.

Option	005	012	009	014	011
Number Hound Starts At	5	12	9	14	11

The “Hare” (Player 1) tries to escape from the “Hound” (Player 2) while the “Hound” tries to catch the “Hare”. The “Hare” (Player 1), starts at the double 20. The dartboard will display what number you must hit. Only the double segments are used in this game. The “Hare” (Player 1) must hit the double 20 to move clockwise to the next number. The “Hound” (Player 2) will start at the double 5 (or 12, 9, 14, 11) segment. The “Hound” (Player 2) must hit the double 5 (or 12, 9, 14, 11) segment to move clockwise to the next number. The players continue to take turns throwing darts and moving around the dartboard. The object is for the “Hound” to catch up to the “Hare”. If the “Hound” (Player 2) hits the same double number that the “Hare” (Player 1) is trying to hit, the “Hound” wins. If the “Hare” (Player 1) makes it back around the dartboard to the double 20, the “Hare” wins.

G15 Halve-It (with options of Single Bull, Double Bull)

There are seven rounds of three darts each in this game. Each round has a target number you must hit to score points. The dartboard will display the number you need to hit for that round. The target numbers for each round are:

Round	1	2	3	4	5	6	7
Target Number	20	16	Double 7	14	Triple 10	17	Bullseye

Players take turns throwing darts and attempting to score points. The dartboard will display the target number that you must hit. If you hit the target number for that round, you will get that number in points. Double segments will double your points and triple segments will triple your points. For example, in Round 1 you have to hit the number 20. If you hit it in a single segment you will get 20 points. If you hit the double 20 you will get 40 points and the triple 20 will give you 60 points. For Round 3 you can only score off the double 7 segment. For Round 5 you can only score off the triple 10 segment and for Round 7 you can only score by hitting the bullseye. If a player misses the designated number on all three darts in a round, their total score is cut in half. The Cricket display keeps track of how many rounds are left. The player with the highest score after all seven rounds wins.

G16 Gold Hunting (with options of 006, 009, 012, 015, 018, 021 and Single Bull, Double Bull)

The options are the number of times you must find gold to win, see the chart below.

Option	006	009	012	015	018	021
No. of Times Finding Gold	6	9	12	15	18	21

The object of the game is to “Find Gold”. You will “Find Gold” when your total score reaches exactly 50 or a multiple of 50 (100, 150, 200 etc.). The Cricket display will keep track of how many times you find gold. The player who “Finds Gold” the designated amount of times first will win the game. However since gold can make you greedy, whenever you “Find Gold” you will also steal 1 “Gold” from every player who has “Gold”.

To score and attempt to “Find Gold” players take turns throwing darts at the dartboard. The number on the dartboard that you hit will be your score. A double segment is worth double points and a triple is worth triple points.

G17 Round-The-Clock (with options of 105, 110, 115, 120 and Single Bull, Double Bull)

The options are are the last number that will be thrown, see the chart below.

Option	105	110	115	120
Last Number Thrown	5	10	15	20

Players must hit numbers 1 through 5 (or 10, 15, 20) in order. The dartboard will display the number that must be hit. The number can be hit in any segment (single, double or triple). A player has to hit the designated number to move on to the next number. The first player to hit all the designated numbers in order, wins.

G18 Round-The-Clock Double/Triple (with options of 205, 210, 215, 220, 305, 310, 315, 320 and Single Bull, Double Bull)

The options are are the last number that will be thrown and the segment that must be hit, see the chart below.

Option	205	210	215	220	305	310	315	320
Last Number Thrown	5	10	15	20	5	10	15	20
	Must hit only Double segments				Must hit only Triple segments			

This game is played the same as Round-The-Clock EXCEPT that only the double (205, 210, 215, 220) or triple (305, 310, 315, 320) segments are used for each number.

G19 Round-The-Clock The Irish Way (with options of Single Bull, Double Bull)

The game is played the same as Round-The-Clock EXCEPT that doubles and triples advance you the amount of the double or triple plus one. For example hitting double 1 will move you to number 3.

Once you pass the number 10, the double and triple segments will count as a miss. Also, if you hit a single segment on a number that would put you over 20, it will count as a miss. If you hit a double 10 your next number will be the bullseye. Players must get two bullseyes in the same turn to win the game.

An example of a game played between 2 players is:

Nick	1st Dart	Next #	2nd Dart	Next #	3rd Dart	Next #
1st Turn	S1	2	T2	7	S7	8
2nd Turn	D8	17	S17	18	S5	18
3rd Turn	S18	19	S19	20	S20	Bull
4th Turn	S8	Bull	Bull	2nd Bull	S1	Bull
5th Turn	Double Bull	WINNER!				
Marilyn	1st Dart	Next #	2nd Dart	Next #	3rd Dart	Next #
1st Turn	S1	2	S2	3	S3	4
2nd Turn	D4	9	S9	10	D10	Bull
3rd Turn	Bull	2nd Bull	S17	Bull	D4	Bull
4th Turn	Bull	2nd Bull	S19	Bull	D18	Bull

G20 Nine-Dart Century (with options of 100, 150, 200 and Single Bull, Double Bull)

The options are are the target score, see the chart below.

Option	100	150	200
Target Score	100 Points	150 Points	200 Points

In this game each player has 9 darts (three turns) to score 100 (or 150, 200) points without going over, or get as close to 100 as possible. If you go over you are “busted” and out of the game. Darts that land outside the scoring area will reset your score back down to zero. Darts that bounce reset your score to zero. The number on the dartboard that you hit will be your score. A double segment is worth double points and a triple segment is worth triple. The Cricket display will show how many darts you have left. The player that gets closest to the Target Score without going over is the winner.

G21 Baseball (with options of b07, b08, b09 and Single Bull, Double Bull)

The options are the number of innings, see the chart below.

Option	b07	b08	b09
No. of Innings	7	8	9

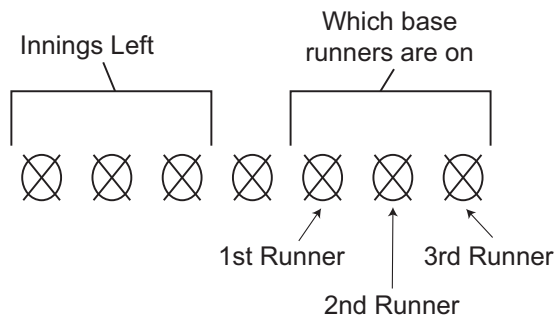

A baseball field is laid out as shown in diagram below. A player throws 3 darts in each inning and the runs/bases are set as follows:

Segments	Result
Single	One Base
Double	Two Bases
Triple	Three Bases
Bullseye	Home Run

A home run can only be scored on the 3rd dart of each turn. The player with the most runs at the end of the game is the winner.

The cricket display will show the number of innings left and what base your “runners” are on. The table below will show the symbols displayed for the base that your “runner” is on.

1st Base	2nd Base	3rd Base	Home
\	X	⊗	⊗ Circle flashes

G22 Football (with options of Single Bull, Double Bull)

To start the game the dartboard will display SEL. The player will then throw a dart at the dartboard to determine their “number” or “playing field”. Once a “playing field” is selected, you must hit the segments in order from the outside double segment of your number working your way in to the bullseye and to the opposite side to the outer double segment. See illustration and example below. A dart that hits a segment out of their playing field or out of order is a miss.

For example, if a player selects segment 11, they have to hit D-11, outer S-11, T-11, inner S-11, outer bullseye, inner bullseye, inner S-6, T-6, outer S-6 and finally D-6. The first player who finishes crossing their playing field is the winner.

G23 Bowling (with options of 10r, 11r, 12r, 13r, 14r, 15r and Single Bull, Double Bull)

Before starting the game you must select the number of players and your desired option. The options are the number of frames, see the chart below.

Option	10r	11r	12r	13r	14r	15r
No. of Frames	10	11	12	13	14	15

For each turn the the dartboard will display SEL. For each turn your first dart will select the “Alley” and the second and third dart will score “pins” or points. Hitting the bullseye will not count as an “Alley” or give you any “pins” or points. “Pins” or points are scored as follows:

Segments	Score
Double	9 Pins
Outer Single	3 Pins
Triple	10 Pins
Inner Single	7 Pins

A player cannot hit the same single segment twice in the same frame. The second hit will be counted as zero. You can hit the same triple or double segment twice. However hitting the double segment twice in a row will give you 10 “pins” or points. Hitting the triple segment twice will give you 20 “pins” or points. The player with the highest points or “pins” at the end of the game is the winner. The Cricket display will count down the number of frames left. The perfect game is 200/220/240/260/280/300 respectively for the options chosen.

G24 Golf (with options of 09F, 10F, 11F, 12F, 13F, 14F, 15F, 16F, 17F, 18F and Single Bull, Double Bull)

The options are the number of “holes”, see the chart below.

Option	09F	10F	11F	12F	13F	14F	15F	16F	17F	18F
No. of Holes	9	10	11	12	13	14	15	16	17	18

Numbers 1-18 are the “Holes” of the golf course and must be hit in order. Players must hit each number three times before they can move on to the next “hole”. A double will count as two hits, a triple will count as three hits. The dartboard will display the best hit for the number you are on. Each dart thrown counts as a “stroke”, whether it hits your designated number or not, and will be displayed on the scoreboard for each player. The cricket display will show how many “holes” are left. The bullseye counts as a miss. The first person to complete all their “holes” wins and the game is over.

G25 Big Six (with options of 3, 4, 5, 6, 7 and Single Bull, Double Bull)

Before starting the game you must select the number of players and your desired option. The options are the number of lives, see the chart below.

Option	3	4	5	6	7
No. of Lives	3	4	5	6	7

This game allows a player to challenge opponents to hit the targets of the players choice. However, players must earn the chance of picking the next target for their opponent by making a hit on the current target first. The dartboard will display the target. The game begins with the single 6 segment as the target. The player that hits this segment first saves a life and can then hit any segment they want. That segment then becomes the target. In any turn if the player does not hit the target they loose one life. If a player hits the target with the first or second dart, the next dart then determines the next target and that players turn is over. If a player hits the target with the third dart their turn is over and the target stays the same. A life is not lost. If a player looses all their lives they are out of the game. The remaining players continue the game until one player is left with lives. That player is the winner.

G26 Hi-Score (with options of H03, H04, H05, H06, H07, H08, H09, H10, H11, H12 and Single Bull, Double Bull)

Before starting the game you must select the number of players and your desired option. The options are the number of rounds, see the chart below.

Option	H03	H04	H05	H06	H07	H08	H09	H10	H11	H12
No. of Rounds	3	4	5	6	7	8	9	10	11	12

The rules are simple. A player must rack up the most points in 3, 4, 5...or 12 rounds (each round is 3 darts) to win. Doubles and triples count as 2 times and 3 times that number's score respectively. The cricket display will count down the remaining rounds. The player with the highest score at the end of all the rounds wins.

G27 Double Down (with options of Single Bull, Double Bull)

Before starting the game you must select the number of players. This game starts with a base score of 60 points for each player. There are 9 rounds for each player. Each round has a number or segment that you must hit in order to score. The dartboard will display what number you must hit for that round. The designated numbers for each round are:

Round	1	2	3	4	5	6	7	8	9
Target Number	15	16	Any Double	17	18	Any Triple	19	20	Bullseye

Each dart that hits the correct number will score points based on the number and the segment. For example, if you hit number 15 single segment you will get 15 points. If you hit the number 15 double segment you would get 30 points. If you hit the number 15 triple segment you would get 45 points. If the player does not hit the designated number during their round their score is cut in half and they move on to the next round on their next turn. For the Any Double and Any Triple, the player must hit any double or triple segment. If the doubles and triples are not hit, the players score is cut in half. The player with the highest score after the last round is the winner.

G28 Under (with options of U-7, U-8, U-9 and Single Bull, Double Bull)

Before starting the game you must select the number of players and your desired option. The options are the number of lives, see the chart below.

Option	U-7	U-8	U-9
No. of Lives	7	8	9

To start the game Player 1 will throw 3 darts. Their score will become the “leader’s score”. The dartboard will announce “Leader” and a fanfare will play. Player 1’s scoreboard will display LEd. Players will take turns throwing darts. The goal is to get a lower score than the “leader’s score”. A player’s score will become a new “leader’s score” if his score in his turn is lower than the previous “leader’s score”. If not, he will lose one life. A leader can choose to challenge his own “leader’s score” but he will lose a life if his score is higher than the “leader’s score”. If a leader does not want to challenge and wants to keep his “leader’s score”, he can press the START/NEXT button and skip his turn. If any player gets the same score as the “leader’s score”, both players will have LEd in their scoreboard. They both have the “leader’s score”. The current “leader’s score” is displayed on the Temporary Score display between players turns. The Cricket display will show how many “Lives” each player has. If a player loses all their lives they are out of the game. The remaining players continue the game until one player is left with lives. That player is the winner.

G29 All Fives (with options of 551, 561, 571, 581, 591 and Single Bull, Double Bull)

Before starting the game you must select the number of players and your desired option. The options are the total points you need to win, see the chart below.

Option	551	561	571	581	591
Total Points	51	61	71	81	91

During each round the player’s total score must be divisible by 5. Every divisible 5 counts as one point. For instance, 2, 8, 5 totals 15. A player will get 3 points as 15 divided by 5 equals 3. There will be no points if the round of 3 darts’ total score is not divisible by 5 or any darts miss, even though the sum of the other 2 darts score is divisible by 5. The e-BOARD Computer will suggest the best possibility for your third dart. The first player to score 51, 61, 71, 81, or 91 will be the winner.

G30 Legs (with options of L03, L04, L05 and Single Bull, Double Bull)

The options are the number of legs, see the chart below.

Option	L03	L04	L05
No. of Legs	3	4	5

Each player will begin with 3 (or 4, 5) “legs”. Players will take turns throwing three darts. Each player must beat the previous players score, or they will loose a “leg”. The last player who still has a “leg” left will win.

ONE YEAR LIMITED WARRANTY

The Manufacturer warrants to the original retail purchaser that this product is free from defects in material and workmanship under normal use and conditions for a period of one year from the date of original purchase. The Manufacturer's liability is limited to the repair or replacement, at its option, of any defective product and shall not include any liability for indirect, incidental or consequential damages of any kind.

Should this product become defective due to material or workmanship within the warranty period, contact our Customer Service Department. This warranty is not transferable and does not cover normal wear and tear or damage caused by improper usage, negligence, misuse, abuse, transportation damage, acts of nature, or accident (including failure to follow the instructions in this manual). It does not cover expendable items such as batteries, light bulbs, fuses, accessories, cosmetic parts and other items that wear out due to normal usage. This warranty is also void if the product is disassembled and reassembled, damaged, modified from its original state, or used for other than indoor personal residential use (no commercial or rental applications).

This warranty gives you specific legal rights, and you may have other rights which vary from state to state.

IF YOU HAVE A WARRANTY CLAIM, CALL US FIRST (8 - 4:30 CST)

Please have your receipt and item number (found on the front cover) when you call.
